

RECOGNITION OF STUDENT ACHIEVEMENT

The development of student intellectual ability, desirable traits of character and qualities of leadership are all achievements the school system desires to encourage and foster. In recognition of outstanding and/or improved achievement, the Board of Education supports academic recognition programs. These programs may include, but should not be limited to, honor rolls, honor societies and other special awards. The Board shall encourage the staff of each building to develop criteria and procedures for these recognition programs.

Effective Date: April 5, 2011
