## Riders' Pathway to Success Quarter 1, 2020-2021 Table of Contents

1. **Table 1:** This table is designed to track Target #1, Project 95. The 2018-19 target has been adjusted as a result of attaining last school year the goal of a *95% graduation rate by 2024*. The graduation rate for 2019-20 was 97.7%. The new target aims to maintain a minimum of 95% graduation rate each year moving forward.
2. **Table 2a, Table 2b & Table 2c:** These three tables are designed to track Target #2 which aims to reduce course failures in grade 6-12. Due to the unique nature of 2020-21, the goal is to maintain or reduce course failures utilizing the 18-19 school year as the baseline. This target is aggressive for this year. Table 2a tracks course failures by subject area in the High School while Table 2b tracks course failures by subject in the Middle School. Table 2c tracks course failures by grade level as opposed to subject area for grades 6-12.
3. **Table 3a:** This table is designed to track Target #3 which aims to increase the mastery level on High School Regents exams. No specific percentage of increase is identified, as the goal is to maintain or increase the number of students at mastery level in light of the sudden change in the learning environment. Targets for all Regents exams are derived from baseline mastery level data on the 2018-2019 Regents exams because this is the last datapoint available. District common assessments are being utilized and data analyzed as a predictor for meeting the target increase in mastery level.
4. **Table 3b:** This table is also designed to track Target #3 which aims to maintain or increase proficiency rates on NY State Assessments in Grades 3-8. Targets for ELA and Math are set based on data from the 2018-2019 NY State Assessment results in grade 3-8. District common assessments are being utilized and data analyzed as a predictor for meeting the target increase in proficiency level.
5. **Table 4:** These tables are designed to track Target #4 which aims to hit 90% proficiency in ELA and Math for students in K-2<sup>nd</sup> grade. District common assessments are being utilized and data analyzed to track progress on this goal.

\* Note all new targets for 2020-2021 referenced above were developed collaboratively through the K-5 and 6-12 Riders' Pathway Teams.

The graduating class of 2021 is currently on track to exceed our target of 95%. It is important to note that reporting on graduation data lags one year behind. Therefore 19-20 graduation data will be reflected on our 2020-2021 NYS Report Card.

High School course failures for Quarter one have significantly increased. The building administrators have plans in place to address the lack of student engagement: the first is a proactive effort to formalize the process being used to catch students not fully engaged in remote learning; the second is a concerted effort to improve “remote” instruction through PD, more firm expectations for teachers, and more buy-in around simultaneous instruction (ICTA); and the third is reinstating targeted intervention strategies such as the Connections Program, homework help, and tiered study halls.

The trend in Middle School course failures is consistent with the High School results and are also significantly increased for Quarter 1. Proactive measures and targeted interventions are also being implemented at the Middle School including Extended Day, academic lunch, and targeted homeroom.

Course failures have increased across the board at the secondary level. This can be attributed to many factors including a lack of engagement and developing teacher facility with simultaneous instruction. Observations of teaching indicate that teachers and students are developing a comfort level with established routines in the hybrid model. In addition survey results also demonstrate increased teacher proficiency with software platforms. Teachers have been identified who are excelling at synchronous instruction and are being leaned on to demonstrate best practices for their colleagues. With the change in grading practices that occurred last spring, course failures will also serve as a much-needed wake-up call for some students.

Baseline data is obtained from mastery levels on all Regents exams administered in 2018-19 because the NYS Testing Program was cancelled in the spring of 2020. District common assessments are being utilized as a predictor towards meeting the target increase in mastery level on all Regents exams. However due to the reduction of in-person instructional days, common assessments for quarter 1 were administered at the discretion of the teacher. Teachers are prioritizing curriculum, and common assessments will be administered at the end of Quarter 2 by all teachers. Developing and utilizing common assessments as an indicator of success on Regents exams is still a relatively new process that requires annual adjustments. Ongoing discussion and reflection is occurring to refine common assessments through data analysis.

Maintaining or increasing the proficiency level on the 3-8 ELA and Math assessments is the target for the 20-21 school year. NYS ELA and Math assessment results from 2018-19 are established as the baseline data. Note: 18-19 is the last year for which we have NYS assessment data. This is an aggressive goal due to the many adjustments made to the learning environment in 20-21 and gaps in curriculum from Spring. Developing and utilizing common assessments as an indicator of success on the NYS 3-8 exams is still a relatively new process for many grade levels and continues to evolve.

**Table 4:**

Riders' Pathway to Success					
Target #4: Achieve 90% Proficiency Rate for K-2 Students <i>Approaching, At, or Above</i> Grade Level in Reading, Writing, and Math					
Grade Level	Reading Common Assessment 1 % Proficient	Reading Common Assessment 2 % Proficient	Reading Common Assessment 3 % Proficient	Reading Common Assessment 4 % Proficient	Target

K	93%				90%
1	98%				90%
2	68 %				90%

A 90% proficiency rate for ELA and Math has been established as the target for all students in kindergarten through second grade for the 20-21 school year. District common assessments are being utilized to monitor this goal. Second grade appears to be off target as compared to K and 1. A deeper dive into this leads us to believe that it may be due to too slow a gradual release of reading responsibility in that grade level. Faculty are currently reevaluating the rate of release of responsibility for students as they transition into grade 2.
